

Tazul Islam

Backend / Full Stack Developer (Django / React)

+880 1842609770 • tazulislam42609770@gmail.com • Mymensingh, Bangladesh

Portfolio | GitHub | LinkedIn | Codeforces | LeetCode

PROFESSIONAL SUMMARY

Full Stack Developer specializing in **Django** and **React**, with proven experience building scalable **REST APIs** and production-ready web applications. Comfortable across the entire stack — from designing efficient **PostgreSQL** schemas and optimizing query performance to shipping responsive, user-friendly interfaces — with basic working knowledge of **Docker** and **CI/CD** for deployment. Holds a B.A. (Honours) in Economics (2026), bringing sharp analytical and problem-solving thinking to technical work.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, C, C++
Backend	Django, Django REST Framework, RESTful API Design, JWT Authentication
Frontend	React.js, Tailwind CSS, Bootstrap, HTML5, CSS3
Database	PostgreSQL, SQL, Query Optimization, Indexing
DevOps & Tools	Git, GitHub, Vercel, Render, Docker & CI/CD Pipelines (Basic)
AI-Assisted Development	Claude, ChatGPT, GitHub Copilot — used for rapid prototyping, debugging, and code review to ship production-quality code faster

PROJECTS

Phul Bazar — Full Stack E-Commerce Platform

Live Site | Frontend Repo | Backend Repo

React.js • Django • Django REST Framework • PostgreSQL • Tailwind CSS

- Built a full-featured e-commerce platform with category-based product filtering, cart management, and order tracking.
- Optimized PostgreSQL queries and added database indexing to improve backend performance.
- Implemented a secure payment gateway with server-side validation through Django REST Framework.
- Built a fully responsive UI with React.js and Tailwind CSS for a consistent experience across devices.

Smart Village — Community Management System (In Progress)

Live Site | Frontend Repo | Backend Repo

React.js • Django • Django REST Framework • JWT Authentication • PostgreSQL

- Designing and building a full-stack platform to give village residents digital access to administrative services, village details, and community updates.
- Building a complaint/feedback module for residents to report issues directly to administrators, along with a notification system to keep them informed.
- Adding an events module so residents can view upcoming village events and activities.
- Securing API endpoints with JWT-based authentication and role-based access control for Admin and Resident roles.
- Optimizing PostgreSQL queries and building a modular Django REST Framework backend for scalable, maintainable services.
- Currently in active development, with core modules functional and deployment/polish ongoing.

Event Management System — Multi-Role Event Platform

Live Site | GitHub Repo

Django MVT • PostgreSQL • Bootstrap

- Developed a multi-role event platform with separate, tailored dashboards for Admin, Organizer, and Participant.
- Enforced CSRF protection, input validation, and permission-based views using Django's built-in auth system.
- Designed a relational database schema and optimized ORM queries to eliminate N+1 query issues.

EDUCATION

CERTIFICATIONS

- Django & Django REST Framework — Phitron
- React.js – Frontend Development — Phitron
- Python for Everybody — Phitron

LANGUAGES

Bengali (Native) • English (Mid Level)

ADDITIONAL INTERESTS

Competitive Programming · System Design · Open Source Contribution · Docker & Containerization · CI/CD Pipelines
